

# Alder Hey

Alder Hey is one of the busiest children's hospitals in Europe, caring for more children than any other in the UK. Ever since we were founded in 1914 we have led the way in the care of sick children and we now treat around 270,000 young patients each year.

Proud of our history and committed to building a better future for all children, Alder Hey is the heart of the North West community. Where there are children, there are families and friends to be considered too and here at Alder Hey we look after the whole family in our care.

We have all been children, so we have a good idea of how a child might feel when they have to visit a hospital. Thankfully, through *Imagine*, we can all do something to help make it a less distressing and more comfortable.

The Alder Hey *Imagine* Appeal makes the difference to the day to day experience of patients at Alder Hey and that means thousands of children benefit each week. Bumped heads, broken limbs, chronic illnesses or cancer – whatever the condition it means distress for children and uncertainty for the family. That is why the *Imagine* Appeal is so important.

Every donation we receive enables us to achieve that little bit more, from researching medical conditions to buying vital equipment, to building a better environment and providing facilities to families.

The *Imagine* Appeal helps not just the children in the UK but through funding research improves the quality of life for children throughout the world. Without the support of people like you, many of the outstanding facilities and innovations at Alder Hey could not have been achieved.
